Correction to: Effect of action-based cognitive remediation on cognition and neural activity in bipolar disorder: study protocol for a randomized controlled trial

Caroline V. Ott 1,2, Maj Vinberg 1, Christopher R. Bowie 3, Ellen Margrethe Christensen 1, Gitte M. Knudsen 4,5, Lars V. Kessing 1,5 and Kamilla W. Miskowiak 1,2*

Following publication of the original article [1], the authors notified us that a comment in the Peripheral and neural biomarkers and genotype section was incorrectly phrased during editing. “4 weeks of treatment (four active ABCR sessions twice a week or control group sessions twice a week)” should have actually been described as “two weeks of treatment (4 active, twice a week, ABCR sessions or 2 weekly control group sessions).”
