**Taxon Name:** *Zingiber pendulum* Mood & Theilade

**Assessment Information**

**Red List Category & Criteria:** Least Concern [ver 3.1](https://dx.doi.org/10.2305/IUCN.UK.2019-3.RLTS.T117468553A124284982.en)

**Year Published:** 2019

**Date Assessed:** March 7, 2019

**Justification:**

This species is only known from the Crocker Range in Sabah, Borneo (ZRC 2019, Theilade and Mood 1997). With the continued protection of the national park (Taman Negara Banjaran Crocker), this species should stay conserved. *Zingiber pendulum* is assessed as Least Concern.

**Geographic Range**

**Range Description:**

This species is endemic to Sabah (Malaysia) on Borneo (WCSP 2019). The only available collection was made on Gunung Alab in the Crocker Range (Theilade and Mood 1997, ZRC 2019).

**Country Occurrence:**

**Native:** Malaysia (Sabah)
Distribution Map

Zingiber pendulum

Population
This species is only known from the type, suggesting that the population is small. The protection of Taman Negara Banjaran Crocker should, however, make it stable (Protected Planet 2019, ZRC 2019).

Current Population Trend: Stable

Habitat and Ecology (see Appendix for additional information)
It has leafy shoots up to 1.65-1.80 cm tall and was found on Gunong Alab in primary forest (Theilade and Mood 1997).

Systems: Terrestrial

Use and Trade
No available use or trade information.

Threats
Forests of Borneo are under continuous threat (WWF 2019). The species should, however, be protected in Taman Negara Banjaran Crocker, and by growing at a higher altitude.

Conservation Actions (see Appendix for additional information)
This species is known from Taman Negara Banjaran Crocker (ZRC 2019, Protected Planet 2019, Theilade and Mood 1997) and is grown ex situ in the Crocker Range Mountain Garden in Sabah (Theilade and Mood 1997).
